| <p>249 Study of postimplantation annealing of SiC
 <i>S.F. Avramenko, V.S. Kiselev,
 B.N. Romanyuk, M.Ya.Valakh</i></p> <p>253 Some features of transverse photovoltage in semiconductor heterostructure and Schottky contact
 <i>L.V. Shekhovtsov</i></p> <p>260 Degenerate four-wave mixing in n-Ge due to intervalley redistribution of hot electrons
 <i>V.M. Vasetskii, V.N. Poroshin, V.A. Ignatenko</i></p> <p>264 Behaviour of manganese impurity in β-ZnP₂
 <i>M. Kakazej, A. Kudin, M. Pinkovs'ka,
 V. Tartachnyk</i></p> <p>273 Density of heavy hole states of Hg_{1-x}Cd_xTe in an isotropic nonparabolic approximation by exact measurements of electron concentration
 <i>V.V. Bogoboyashchyy</i></p> <p>278 Investigations of impurity gettering in multicrystalline silicon
 <i>A.A. Evtukh, V.G. Litovchenko, A.S. Oberemok,
 V.G. Popov, Yu. V. Rassamakin,
 B.N. Romanyuk, S.G. Volkov</i></p> <p>283 The impact of laser shock waves on anodic oxide – compound semiconductor interface
 <i>V.S. Yakovyna, N.N. Berchenko,
 Yu.N. Nikiforov</i></p> <p>287 Hopping conductivity in GaSe monocrystals at low temperatures
 <i>A.M. Pashayev, A.R. Gadjiyev, T.B. Tagiyev,
 T.M. Abbasova</i></p> <p>290 Investigation of ArF* excimer laser VUV radiation action on sapphire
 <i>S.M. Baschenko, K.S. Gochelashvili,
 R.M. Zakirov, V.I. Klimov, V.T. Mikhkelsoo,
 O.M. Prokhorov</i></p> | <p>298 Ordering of lateral nonuniformity of TiB_x film and transition layer in the TiB_x-GaAs system
 <i>R.V. Konakova, V.V. Milenin,
 D.I. Voitsikhovskiy, A.B. Kamalov,
 E.Yu. Kolyadina, P.M. Lytvyn, O.S. Lytvyn,
 L.A. Matveeva, I.V. Prokopenko</i></p> <p>301 Experimental investigations and computer modelling of the photochemical processes in Ag-As₂S₃ structures using surface plasmon resonance spectroscopy
 <i>V.I. Chegel', Yu.M. Shirshov, S.O. Kostyukevich,
 P.E. Shepeliavy, Yu.V. Chegel'</i></p> <p>307 The influence of heating temperature and sizes of components upon stresses and defect formation in semiconductor structures under isothermal heating
 <i>O.A. Agueev, A.M. Svetlichny</i></p> <p>313 Optical and protective properties of different type diamond and diamond-like carbon films
 <i>T.V. Semikina, A.N. Shmyryeva</i></p> <p>318 Comprehensive studies of defect production and strained states in the silicon epitaxial layers and device structures based on them
 <i>N.S. Boltovets, D.I. Voitsikhovskiy,
 R.V. Konakova, V.V. Milenin, V.A. Makara,
 O.V. Rudenko, M.M. Mel'nichenko</i></p> <p>323 Influence of phonon dispersion on exciton damping in ionic crystals
 <i>N.I. Grigorchuk</i></p> <p>331 Microwave-induced optical non-linearity of amino acid crystals
 <i>L.I. Berezhinsky, G.I. Dovbeshko,
 V.V. Obukhovskiy</i></p> <p>337 Features of optical properties of ferromagnetic semiconductors with dynamic laser-induced gratings
 <i>O.Yu. Semchuk, R.Z. Veskliarskii,
 K.G. Kosharskii</i></p> |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

- 343 SPR-spectroscopy of protein molecules adsorbed in microwave field**
L.I. Berezhinsky, V.I. Chegel', Yu.M. Shirshov, G.I. Dovbeshko, O.V. Melnichuk
- 347 Optical transmittance of 2D macroporous silicon structures**
L.A. Karachevtseva, O.O. Lytvynenko, E.O. Malovichko, O.J. Stronska, E.V. Busaneva, O.D. Gorchinsky
- 352 Thickness dependences of optical constants for thin layers of some metals and semiconductors**
S.A. Kovalenko, M.P. Lisitsa
- 358 Dynamics of photoinduced instability in ferroelectric photorefractive crystals**
A.N. Morozovska, V.V. Obukhovsky, V.V. Lemesko
- 375 Electrooptical properties of liquid crystal n-pentil-n'-cyanobifenil with J-aggregates of astrofloxine**
Yu.P. Piryatinski, M.S. Furier, V.G. Nazarenko
- 383 New method of apertured electromagnetic field modeling**
S. Anokhov, A. Khizhnyak, R. Lymarenko
- 389 Group delay investigation of N-order chirping mirrors**
V.V. Lysak, I.A. Sukhoivanov, S.I. Petrov
- 391 Raman scattering of light in biaxial monocline β -ZnP₂ crystals**
V.O. Gubanov, V.D. Kulakovs'kij, R.A. Poveda, Z.Z. Yanchuk
